Current Guidance

Social Distancing

Workers should maintain a distance of two metres, or one metre with risk mitigation where two metres is not viable.

Construction can continue to operate; however, any additional local authority restrictions must be complied with.

National guidance on social distancing in England, Scotland, Wales and Northern Ireland should be adhered to off-site

Going to Work

Workers must work from home if they can. Those who cannot work from home, which includes workers in construction, manufacturing, logistics and distribution, should go to work.

Workplaces that are open should be **Covid-19 secure**.

Face Coverings

In accordance with **The Use of Face Coverings in Construction**, where workers on site are not required to wear Respiratory Protective Equipment (RPE) and their workplace (which may include welfare and changing facilities, site offices or site meeting rooms) meets all of the criteria below, their employer should make face coverings available and they should be worn in:

- An enclosed space;
- Where social distancing isn't always possible; and
- Where they come into contact with others they do not normally meet.

In line with Government guidance on premises providing hospitality, face coverings must be worn in canteens except when seated at a table to eat or drink.

Introduction

These Site Operating Procedures (SOP) are based on Government guidance on Working safely during Coronavirus (Covid-19) - Construction and other outdoor work (in England; other restrictions and advice may apply in Scotland, Wales and Northern Ireland, as well as in areas subject to a localised lockdown. The objective is to introduce consistent measures on construction sites of all types and sizes and employers and individuals should make every effort to comply.

Where workers enter people's homes, they should follow the Government guidance on Working in Other People's Homes.

The HSE is the relevant enforcing authority for occupational health and safety legislation and guidance to control public health risks in the construction sector. If a site is not complying with the latest Government advice on Coronavirus (Covid-19), it may be subject to enforcement action.

Construction sites / Head Office need to ensure they are protecting their workforce and minimising the risk of spread of Coronavirus (Covid-19) infection. This includes considering how personnel travel to and from site / office.

Government guidance for employers in England states "where the social distancing guidelines cannot be followed in full, in relation to a particular activity, and the activity cannot be redesigned, businesses should consider whether that activity needs to continue for the business to operate, and, if so, take all the mitigating actions possible to reduce the risk of transmission between staff".

The health and safety requirements of any construction activity must not be compromised at this time. If an activity cannot be undertaken safely, it should not take place.

Organisations must have in place effective arrangements for monitoring and reviewing their compliance with Government and industry guidance.

The workforce should be reminded during inductions and daily briefings of the specific social distancing and coronavirus (Covid-19) control measures necessary to protect them, their colleagues, families and the UK population.

When to Go to Work

It is important to understand the following guidelines by which workers should or should not travel to work as outlined below.

Social distancing	<p>Workers in the construction industry should follow the guidance on Social Distancing. Where they cannot work from home, they must follow guidance on Meeting With Others Safely and Safer Travel while travelling to and from work and while at work.</p> <p>Anyone who is clinically extremely vulnerable to Coronavirus (Covid-19) should follow the latest guidance on shielding</p>
Self-isolation	<p>Anyone who:</p> <ul style="list-style-type: none"> • symptoms of Coronavirus (Covid-19); • received a positive Coronavirus (Covid-19) test result; <ul style="list-style-type: none"> • member of their household or support bubble showing symptoms of Coronavirus (Covid-19) or with a positive test result; • returned from a country that is not on the travel corridor list; or • been contacted by the NHS Test & Trace Service; <p>must follow the guidance on self-isolation and should not come to site.</p> <p>It is a legal requirement to self-isolate in the event of a positive test result or when told to do so by NHS Test & Trace</p>

<p>If someone falls ill</p>	<p>If a worker develops symptoms of Coronavirus (Covid-19) whilst at work, they should:</p> <ul style="list-style-type: none"> • Ensure their manager or supervisor is informed • Return home immediately • Avoid touching anything • Cough or sneeze into a tissue and put it in a bin, or if they do not have tissues, cough and sneeze into the crook of their elbow. <p>They should get a Coronavirus (Covid-19) test.</p> <p>They must follow Stay at home: guidance for households with possible or confirmed coronavirus (COVID-19) infection and not return to site / office until they have received a negative test result or, in the event of a positive test result, until they have completed their period of self-isolation and are no longer unwell.</p> <p>Sites that are informed of more than one confirmed case within 14 days will need to contact their local Public Health England protection team.</p> <p>Further information can be found in the 'What to do if a worker has Covid-19 or has to self-isolate' flowchart.</p>
-----------------------------	--

Travel to Work

Using Private Vehicles

Wherever possible workers should try not to share a vehicle with those outside their household or support bubble. If workers have no option but to share transport, they should try to:

- Share with the same individuals and with the minimum number of people (up to a maximum of 6) at any one time
- Keep the windows open
- Travel side by side or behind other people, rather than facing them, where seating arrangements allow
- Maximise the distance between people
- Wear a face covering
- The vehicle should be cleaned between journeys, especially touch points, using gloves and standard cleaning products.

Using Public Transport

Where public transport is the only option for workers, they:

- Should try to avoid travelling during peak times (05:45 - 8:15 and 16:00 - 17:30); and
- Must wear a face covering.

Sites should consider:

- Changing and staggering site hours to reduce congestion on public transport
- Parking arrangements for additional vehicles and bicycles
- Providing facilities such as lockers and showers
- Providing hand cleaning facilities at entrances and exits. This should be soap and water wherever possible or hand sanitiser if soap and water are not available
- How someone taken ill would get home.

Driving at Work

When travelling at work or between site locations, workers should travel alone. If workers have no option but to share a vehicle, then they should follow the Government guidance on [Working Safely during Coronavirus \(Covid- 19\) - Vehicles](#), which provides information for people who work in or from vehicles, including couriers, mobile workers, lorry drivers, on-site transit and work vehicles, field forces and similar.

Site Access and Egress Points

- Stop all non-essential visitors
- Consider introducing staggered start and finish times to reduce congestion and contact at all times
- Plan and manage site access and egress points to enable and control social distancing – you may need to change the number of access points, either increase to reduce congestion or decrease to enable monitoring, including in the case of emergencies
- Introduce one-way systems
- Allow plenty of space between people waiting to enter site
- Use signage:
 - such as floor markings, to ensure current social distancing requirements are maintained between people when queuing
 - reminding workers not to attend if they have symptoms of Coronavirus (Covid-19) and to follow guidelines
- Require all workers to use hand sanitiser when entering and leaving the site
- Reduce the number of people in attendance at site inductions and consider holding them outdoors wherever possible
- On arrival to site the sub-contractor supervisor will sign his operatives in, the signing book will be located within the site office. It is recommended that the supervisor uses his own pen when signing in all his operatives. Hand sanitiser and anti-bacterial wipes will be available next to the signing in book. All communications from the sub- contractor to the site manager will be via their site supervisor.
- Where loading and offloading arrangements on site will allow it, delivery drivers should remain in their vehicles. Where drivers are required to exit their vehicle, they should wash or sanitise their hands before handling any materials
- Drivers must be provided with access to suitable toilet and hand washing facilities and made aware of the social distancing measures in place
- Consider arrangements for monitoring compliance.

Hand Washing

- Allow regular breaks to wash hands
- Ensure adequate supplies of soap and fresh water are readily available and kept topped up at all times
- Provide hand sanitiser (minimum 60% alcohol based) where hand washing facilities are unavailable
- Regularly clean the hand washing facilities

Provide suitable and sufficient rubbish bins for hand towels with regular removal and disposal

Toilet Facilities

- Restrict the number of people using toilet facilities at any one time and use signage, such as floor markings, to maintain current social distancing requirements.
- Wash or sanitise hands before and after using the facilities
- Enhance the cleaning regimes for toilet facilities, particularly door handles, locks and the toilet flush
- Portable toilets should be cleaned and emptied more frequently
- Provide suitable and sufficient rubbish bins for hand towels with regular removal and disposal.

Canteens and Rest Areas

Face coverings must be worn in canteens (where food is served), except when seated at a table to eat or drink, and Government guidance on Keeping workers and customers safe during Covid-19 in restaurants should be followed. This Food Standards Agency Checklist may also be helpful.

Rest areas where no food is served but which have facilities to prepare and eat food and a means of boiling water are not required to display an NHS QR code.

- Consider increasing the number or size of facilities available on site if possible
- The capacity should be clearly identified at the entry to each facility, and where necessary attendants provided to supervise compliance with social distancing measures
- Break times should be staggered to reduce congestion and contact at all times
- Drinking water should be provided with enhanced cleaning measures of the tap mechanism introduced
- Frequently clean surfaces that are touched regularly, using standard cleaning products e.g. kettles, refrigerators, microwaves
- Hand cleaning facilities or hand sanitiser should be available at the entrance to any room where people eat and should be used by workers when entering and leaving the area
- Seating and tables should be reconfigured to reduce face to face interactions
- All rubbish should be put straight in the bin and not left for someone else to clear up
- Tables and chairs should be cleaned between each use
- Crockery, eating utensils, cups etc. should be disposable or washed and dried between use
- Consider arrangements for monitoring compliance.

Changing Facilities and Drying Rooms

- Consider increasing the number or size of facilities available on site if possible
- Based on the size of each facility, determine how many people can use it at any one time to maintain current social distancing requirements.
- Restrict the number of people using these facilities at any one time
- Introduce staggered start and finish times to reduce congestion and contact at all times
- Introduce enhanced cleaning of all facilities throughout the day and at the end of each day
- Provide suitable and sufficient rubbish bins in these areas with regular removal and disposal.

Work Planning to Avoid Close Working

Sites and work need to be planned and organised to avoid crowding and minimise the risk of spread of infection by following Government guidance and the advice within these Site Operating Procedures.

Hierarchy of Controls

If you are not able to work whilst maintaining current social distancing requirements, you should consider whether the activity should continue and, if so, risk assess it using the hierarchy of controls below and against any sector- specific guidance. The results of risk assessments should be shared with the workforce and displayed in the workplace.

Eliminate	<ul style="list-style-type: none"> • Workers who are unwell with symptoms of Coronavirus (Covid-19) should not travel to or attend the workplace • Rearrange tasks to enable them to be done by one person, or in a way that maintains current social distancing requirements. • Avoid skin to skin contact and face to face working • Stairs should be used in preference to lifts or hoists and consider one ways systems • Consider alternative or additional mechanical aids to reduce worker interface Site Meetings • Only absolutely necessary meeting participants should attend • Attendees should maintain current social distancing requirements • Rooms should be well ventilated / windows opened to allow fresh air circulation • Hold meetings in open areas where possible
Reduce	<p>Risk mitigation, where current social distancing requirements cannot be maintained, could include the following:</p> <ul style="list-style-type: none"> • Minimise the frequency and time workers are working together where current social distancing requirements cannot be maintained • Minimise the number of workers involved in tasks where current social distancing requirements cannot be maintained • Workers should work side by side, or facing away from each other, rather than face to face • Lower the worker capacity of lifts and hoists to reduce congestion and contact at all times • Regularly clean common touchpoints, doors, buttons, handles, vehicle cabs, tools, equipment etc. • Increase ventilation in enclosed spaces <p>Workers should wash their hands before and after using any equipment</p>
Isolate	<p>Keep groups of workers:</p> <ul style="list-style-type: none"> • Together in teams e.g. do not change workers within teams • As small as possible <p>Away from other workers where possible</p>
Control	<ul style="list-style-type: none"> • Consider introducing an enhanced authorisation process • Provide additional supervision to monitor and manage compliance
PPE	<ul style="list-style-type: none"> • Coronavirus (COVID-19) needs to be managed through social distancing, hygiene and the hierarchy of control and not through the use of PPE • Workplaces should not encourage the precautionary use of extra PPE to protect against Coronavirus (COVID-19).

Behaviours	<p>The measures necessary to minimise the risk of spread of infection rely on everyone in the industry taking responsibility for their actions and behaviours.</p> <p>Encourage an open and collaborative approach between workers and employers on site where any issues can be openly discussed and addressed.</p>
------------	--

First Aid and Emergency Service Response

The primary responsibility is to preserve life and first aid should be administered if required and until the emergency services attend.

- When planning site activities, the provision of adequate first aid resources must be agreed between the relevant parties on site
- Emergency plans including contact details should be kept up to date
- Consideration must also be given to potential delays in emergency services response, due to the current pressure on resources
- Consider preventing or rescheduling high-risk work or providing additional competent first aid or trauma resources.

Cleaning

Enhanced cleaning procedures should be in place across the site, particularly in communal areas and at touch points including:

- Taps and washing facilities
- Toilet flush and seats
- Door handles and push plates
- Hand rails on staircases and corridors
- Lift and hoist controls
- Machinery and equipment controls
- All areas used for eating must be thoroughly cleaned at the end of each break and shift, including chairs, door handles, vending machines and payment devices.
- Telephone equipment
- Key boards, photocopiers and other office equipment
- Rubbish collection and storage points should be increased and emptied regularly throughout and at the end of each day.

Positive Tests

If the test is positive

If the person with symptoms tests positive for COVID-19. They must immediately inform their inline manager and go home. The NHS Test and Trace service will notify their close contacts and instruct them to self-isolate.

This will occur by either a phone call, text message, email or letter. The period of self-isolation will be for up to 14 days, from the point of most recent contact with the person who has tested positive for coronavirus. When Test and Trace advises contacts to self-isolate, the service does not tell them the identity of the person who has tested positive.

Alerting close contacts

When someone first develops symptoms and orders a test, they will be encouraged to alert the people that they have had close contact with in the 48 hours before symptom onset. If any of those close contacts are co-workers, the person who has developed symptoms must inform their line manager.

Close contacts at this stage do not need to self-isolate unless requested to do so by NHS Test and Trace or a public health professional, but they should:

- avoid contact with people at high increased risk of severe illness from coronavirus, such as people with pre-existing medical conditions
- take extra care in practising social distancing and good hygiene
- watch out for symptoms and self-isolate if they also show signs of coronavirus

The Deeley board of directors will keep staff informed about COVID-19 cases among their colleagues. If a co-worker is at risk because of close contact with the positive case, then they will be notified to self-isolate by the NHS Test and Trace service.

Cleaning and disinfection

Communal areas where a symptomatic person has passed through and spent minimal time but which are not visibly contaminated such as corridors, can be cleaned thoroughly as normal.

All surfaces that the symptomatic person has come into contact with should be cleaned and disinfected, including all potentially contaminated and frequently touched areas such as bathrooms, door handles, telephones, grab rails in corridors and stairwells

Use disposable cloths or paper roll and disposable mop heads, to clean all hard surfaces, floors, chairs, door handles and sanitary fittings – think one site, one wipe, in one direction.

The undersigned Deeley Employee / Site Manager has agreed to work to the above procedure. If the Site Manager requires to make any changes it must be agreed by Steve Turner, Construction Director.

All Deeley employees are required to take two Lateral Flow Tests per week and the results of these tests must be up loaded to the GOV.UK website using Deeley's unique organisation number.

Staying COVID-19 Secure in 2020

We confirm we have complied with the government's guidance on managing the risk of COVID-19

FIVE STEPS TO SAFER WORKING TOGETHER

	We have carried out a COVID-19 risk assessment and shared the results with the people who work here
	We have cleaning, handwashing and hygiene procedures in line with guidance
	We have taken all reasonable steps to help people work safely from a COVID-19 Secure workplace or work from home
	We have taken all reasonable steps to maintain a 2m distance in the workplace
	Where people cannot keep 2m apart we have ensured at least a 1m distance and taken all the mitigation actions possible to manage transmission risk

Employer: Deeley Group Limited

Date: 08.01.2021
